- the Tugoslav Government support to accomplish?
- A. For nearly a year the US has constantly been attacked, not only in the Yugoslav Press and radio for world consumption, but also in various debating groups, reading circles and political conferences mithin Tugoslavia. The US has been singled out as the chief energy of the "progressive" forces. The new campaign is to provide material for inner communities of the USER and the satellites, where every speech or article will be thoroughly analyzed. The aim of this compaign is to create the impression that the US is not a democratic country and is proparing for war. At the time this propaganda serves the purpose of compolling the people to do more work under harder conditions, and gives the USSR and the satellites an excuse and explanation for their proparation for war and maintenence of huge armics.

This propaganda compaign serves also to provide the Communist Parties in the western powers, copecially in the US, with material for internal propaganda in which the USSR has to pose as a power that is a guardium of peace and one which exposes the circles that would profit by a war. Whatever the result of voting in the UN may be and whatever the answere of the democratic statesmen, the speeches of Vishinsky and Manuilaky will be analyzed and discussed in every purty unit and cell, printed and reprinted, and as such used in canvascing emong the people.

The chief aim inside the US is to alienate the "broad muses" from the Government so that, in the event of future war, they would in greater or lesser degree refuse to fight or obey orders and would be encouraged to substage. It should be noted that the present attacks on the US will ergate a real hysteria among the people in the Soviet orbit, and possibly the propaganda is simed at furnishing beforehend a reason for a political coup in combating the Marshall Plan or perhaps a reason for taking over by violonce the Coverment in some country. The attack on the US is in form and content so strong and so much without any nacotics that it is impossible that it has only tootical purposes to achieve even small gains in international conferences. The crousing of feeling internally to such a pitch is something so grave that the Soviet leaders would not dere to do it without a hope of achieving adequate results.
